

## Year 2/3 Room 14

Last term was very busy. We went to the Perth Zoo with Room 9 and 12. We looked at all the amazing animals and had a fantastic time.

### Our Trip To The Perth Zoo by Ruby Wyllyams Year 2

Yesterday we went to the Perth Zoo for a school excursion. First our group saw the Australian animals and in the Australian section I saw kangaroos, numbats, echidnas, dingos, koalas and the big crocodile. Then we saw the beautiful birds.

Then we went and saw the Asian Rainforest. In the Asian Rainforest we saw tigers and two sun bears.

Then we went to the African Savannah and I saw rhinos, lions and giraffes.

After that we went to the Nocturnal House. I saw bats, spiny leaf insects, snakes and hopping mice.

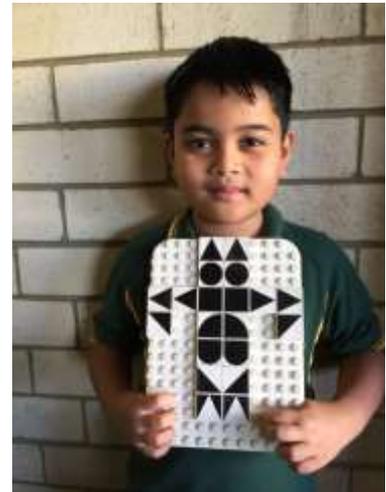

Then we went to a special classroom. We got to feel a blue tongue lizard and a python. The lady's name was Leah. The python was scaly, the lizard was bumpy and scaly too.

I had a lot of fun at the zoo. My favourite animal was the tiger. I had a great time at the Perth Zoo with my class.

We also worked very hard on our STEM projects. We made little creatures out of recycle materials, then we painted them and lastly we had to make them move using a little battery and motor. We had lots of fun.

We have also been to the DACTA room to learn the names of the Mosaic tile shapes and to learn maths concepts such as patterns and symmetry. We also really enjoy constructing and building many amazing things.

This week we celebrated 100 Days of School. We had a fun Maths day and we brought 100 objects to school. We sorted them into different groups and we also weighed them.

We also did many other activities with the number 100. We rolled the dice and then we found out how many rolls it took to get to 100. We also had to sort 100 smarties into different colours. We then had to count them by 2's and make a graph. We loved eating the smarties at the end.
